

SUPRACIX

PREMIUM FERTILIZER WITH AMINO ACIDS

Technical Data Sheet

Revision

Date

DESCRIPTION

SUPRACIX is a liquid fertilizer of special composition, enriched with amino acids and designed to promote plant growth and development, especially in periods of high physiological demand or under adverse conditions.

Its formulation contains 20% extract of *Ascomyces nodosum* and 40% organic matter from liquid fractions of plant material, providing natural bioactive compounds that enhance the plant's physiological activity and improve its response to stress conditions.

It has a marked anti-stress effect, helping the plant recover more quickly after mechanical, chemical, or biological damage. In addition, it helps activate plant metabolism, improve nutrient absorption, and promote overall crop vigor.

SUPRACIX contributes to root development, vegetative growth, and flowering and ripening processes, improving productive potential and final crop quality.

GUARANTEED ANALYSIS AND DOSAGE

Guaranteed analysis:

Total Nitrogen (N)	7.00%
Potassium Oxide (K ₂ O)	5.00%
Calcium Oxide (CaO)	2.50%
Magnesium Oxide (MgO)	2.50%
Free Amino Acids	3.00%
Fulvic Acids	11.00%
Humic Acids	1.00%
Total Humic Acids	12.00%

Dosage:

Vegetables, ornamentals and nurseries:

5–10 L/Ha per week.

Stone fruits, citrus and vineyards:

20 L/Ha every 15–20 days.

BENEFITS

Promotes plant growth and development.

Helps plant recovery in times of stress.

Stimulates root system formation and development.

Contributes to improving physiological activity and metabolic response of the crop.

Increases efficiency in nutrient absorption and utilization.

Promotes flowering and ripening processes.

Helps improve yield and final quality of production.

STORAGE AND COMPATIBILITY

Store tightly closed in the original container and keep in a cool place.

Avoid exposure to air or humidity for extended periods.

Can be used in tank mixes with many fertilizers and plant protection products. Do not use together with products containing copper, sulfates, mineral oils or alkaline products (pH > 8).

Avoid use at extreme temperatures.

It is recommended to perform a compatibility test before application or when mixing with other products.
